Influenced by their cultural background, havana del alma creates a refreshing mixture of Creole-, Latin- and North American songs.

Deeply rooted to Cuban folk songs, the band understands to rearrange old musical beads and gives them a new modern touch.

In addition, the four musicians enrich their repertoire with their own compositions, which integrate perfectly into havana del alma's musical complete works.

In their show, the band presents besides cover songs from Matamoros, Hernandez, Roig and Carrillo mostly originals, by which the audience is regularly inspired.

havana del alma recorded its first CD "momentos" in 2006. Temporary, the band is writing for their second album, which will be released in spring 2011.
